

# Make It Your Own

BY STEINHAFELS

## ODYSSEY COLLECTION

Michael Nicholas Designs started with a single goal: to make sofas for an unparalleled value at starting retail price points. With a very focused product offering of stationary upholstery paired with exceptional fabric choices, there was an opportunity to make an impact in the local Southern California furniture manufacturing community.

With a core group of five talented people, Michael Nicholas Designs opened in late spring of 2003. As the demand for products grew, the company expanded. A professional sales and support team were added as the business tripled its amount of manufacturing square footage. Production areas for cutting and sewing became dedicated departments as new team members came aboard. The company transformed from a regional supplier to a national furniture manufacturer.

Today, Michael Nicholas Designs continues to strategically grow, adapting to the dynamic business climate. But its focus on quality and value at retail remains core to its vision; A passionate and ever-growing team making the world a more comfortable place by bringing stylish trends to every home.
